

PETITIONS OPPOSING THE FLORENCE COPPER PROJECT

Submitted to:

Ms. Nancy Rumrill
U.S. Environmental Protection Agency, Region 9
Drinking Water Protection Section
Mail Code WTR-3-2
75 Hawthorne Street
San Francisco, CA 94105

In the Matter of
Draft Class III Underground Injection Control Area Permit
Permit Number R9UIC-AZ3-FY11-1
Florence Copper, Inc.

We, the undersigned Pinal County property owners, believe that it is our duty as citizens to stand together to oppose the proposed Florence Copper Project and Florence Copper's efforts to install an in-situ mining operation in and adjacent to the Town of Florence. We believe the proposed Florence Copper Project will have a negative effect on our environment, the economy, the Town of Florence and surrounding communities, the multi-million dollar Anthem at Merrill Ranch development, along with other existing area developments and future planned residential, retail, and light industrial development. The proposed project by Florence Copper will drastically alter the Town of Florence's approved General Plan along with significantly undermining the already approved, and currently being developed, Merrill Ranch Master Planned Community. The Town of Florence stands to gain more economically in the long-term under the current General Plan. We believe that the proposed Florence Copper Project is too risky to be this close to our communities, our water resources, and our families. We say **NO!** to the proposed Florence Copper Project.

PETITION TO OPPOSE FLORENCE COPPER PROJECT

We, the undersigned Pinal County property owners, believe that it is our duty as citizens to stand together to oppose the proposed Florence Copper Project and Florence Copper's efforts to install an in-situ mining operation in and adjacent to the Town of Florence. We believe the proposed Florence Copper Project will have a negative effect on our environment, the economy, the Town of Florence and surrounding communities, the multi-million dollar Anthem at Merrill Ranch development, along with other existing area developments and future planned residential, retail, and light industrial development. The proposed project by Florence Copper will drastically alter the Town of Florence's approved General Plan along with significantly undermining the already approved, and currently being developed, Merrill Ranch Master Planned Community. The Town of Florence stands to gain more economically in the long-term under the current General Plan. We believe that the proposed Florence Copper Project is too risky to be this close to our communities, our water resources, and our families. We say **NO!** to the proposed Florence Copper Project.

PETITION TO OPPOSE FLORENCE COPPER PROJECT

We, the undersigned Pinal County property owners, believe that it is our duty as citizens to stand together to oppose the proposed Florence Copper Project and Florence Copper's efforts to install an in-situ mining operation in and adjacent to the Town of Florence. We believe the proposed Florence Copper Project will have a negative effect on our environment, the economy, the Town of Florence and surrounding communities, the multi-million dollar Anthem at Merrill Ranch development, along with other existing area developments and future planned residential, retail, and light industrial development. The proposed project by Florence Copper will drastically alter the Town of Florence's approved General Plan along with significantly undermining the already approved, and currently being developed, Merrill Ranch Master Planned Community. The Town of Florence stands to gain more economically in the long-term under the current General Plan. We believe that the proposed Florence Copper Project is too risky to be this close to our communities, our water resources, and our families. We say **NO!** to the proposed Florence Copper Project.

PETITION TO OPPOSE FLORENCE COPPER PROJECT

We, the undersigned Pinal County property owners, believe that it is our duty as citizens to stand together to oppose the proposed Florence Copper Project and Florence Copper's efforts to install an in-situ mining operation in and adjacent to the Town of Florence. We believe the proposed Florence Copper Project will have a negative effect on our environment, the economy, the Town of Florence and surrounding communities, the multi-million dollar Anthem at Merrill Ranch development, along with other existing area developments and future planned residential, retail, and light industrial development. The proposed project by Florence Copper will drastically alter the Town of Florence's approved General Plan along with significantly undermining the already approved, and currently being developed, Merrill Ranch Master Planned Community. The Town of Florence stands to gain more economically in the long-term under the current General Plan. We believe that the proposed Florence Copper Project is too risky to be this close to our communities, our water resources, and our families. We say **NO!** to the proposed Florence Copper Project.
